No Directory was published in Philadelphia before the year 1785; the Houses were not numbered until 1790. Clement Biddle, who was then United States Marshall, is believed to have given numbers to the houses at the time he was taking the Census, and while thus engaged collected the names for a Directory, which was published in 1791. Two Directories were pubiished in each of the following years—1785, 1811, 1817 and 1837.

YERGER & ORD,

PATENTEES & MANUFACTURERS

OF THE

METALLIC SKELETON

ARTIFICIAL LEG,

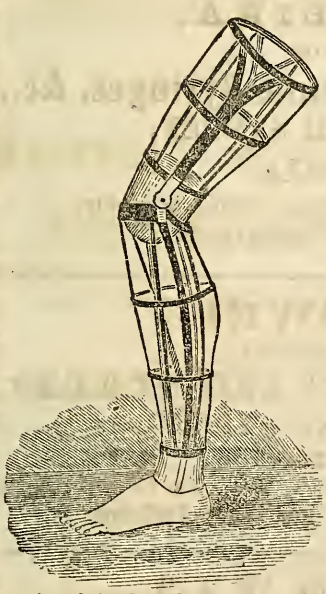
ANKLE SUPPORTER,

AND

IMPROVED ANATOMICAL MACHINERY

FOR THE

Treatment of Deformities.



The Metallic Skeleton Limb is *light, neat, strong, and durable*, it is constructed of steel ribs, and rings, or bands, united together upon the principle of a lattice bridge, or arch, one piece bracing and sustaining the other, rendering it capable of bearing any required weight; the socket or receptacle of the stump being open below, allows a free circulation of air, keeping it always cool and healthy, thereby preventing ulceration, which is almost invariably the consequence when the stump is confined in air-tight sockets.

The motions of the knee and ankle joints approach so near to nature as to render it almost impossible to distinguish it from the natural limb, and it can be adapted to every form of amputation, and worn without the least difficulty.

No stronger proof can be given of its superiority than the fact that it has been examined and approved of by all of the eminent Surgeons and Physicians in Philadelphia, and elsewhere, to whom we take pleasure in referring at all times.

The Massachusetts Charitable Mechanics Association, the American Institute, New York, and the Franklin Institute, Philadelphia, have awarded Silver Medals to Yerger & Ord, for the Skeleton Leg and Deformity Apparatus constructed by them. The public are cautioned against a certain party who is endeavouring in *vain* to *bolster* up his *shackling business* by circulating a *petty species of slander*, which has been justly refuted by an overwhelming patronage from those he expected to win, by pursuing a course too far beneath the *character of a man* for us to notice in detail.

Every information in reference to the Metallic Leg, Ankle Supporter, and Instruments for Deformity, will be given, on application personally, or by letter (post paid) to No. 7 Phœnix Block, South-west corner of Second and Dock Streets, Philadelphia.

LIGHTNING RODS.

The awful calamities that every City, Town, Village, and Country falls victim to annually, through the gross negligence of its inhabitants, is beyond calculation, and especially when the remedy is so easy to obtain—this is found in

ARMITAGE'S

Patent Magnetic Lightning Rods,

and in this alone. This Rod has been examined by the most scientific gentlemen in the world—Professors M'Murtrie, Johnson, Wallor, and many others that have examined them, recommend and speak of them in the highest terms of approbation, and have pronounced them the only safe rods now in use in this or any other country, FOR THE PROTECTION OF LIVES AND PROPERTY. One advantage is to divide and throw back a part of the electric fluid harmless to the Clouds, this is in time of a Stroke, this enables the rod to conduct that portion of fluid that belongs to the earth without the slightest danger of leaving the conductor. This rod has many other advantages over the old one. The only place of manufacturing is in

Vine Street, Three doors above Twelfth Street, Philadelphia,

where all persons are respectfully invited to call and examine for themselves. For Sale Wholesale and Retail.

My only agent for the Eastern States is MR. CHAS. STACKPOLE, No. 300 Washington Street, Boston.

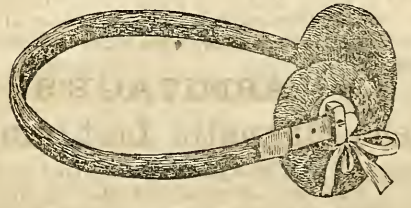
DR. HEINTZELMAN'S

GUM-ELASTIC PAD TRUSS.



The great and signal benefits which are produced by this Truss, result from its strict subservience to, and its accordance with, scientific and surgical principles. Its mechanical adaptation to the parts, the simplicity of construction, the limited motion nicely graduated, by experiment, to the different attitudes of the body, and to the action of the muscles, the permanency of its location on the body, and its pressure on the circumference of the abdominal ring, are qualities, the tendency of which are to strengthen and restore the weakened parts, to contract the aperture, and ultimately to *accomplish a cure of the disease.* The operation and effect of this Truss is therefore directly the reverse of all Trusses heretofore in use, which, being convex, tend to enlarge the rupture opening.
